

*Su B*

Please cancel Claims 10 and 11 in favor of new Claims 12 and 13 as follows:

*A2*

--12. (Newly Added) A method for forming a barrier rib for an EL display element,

which comprises:

applying a solution of a radiation sensitive composition comprising (A) an alkali soluble resin, (B) a polymerizable compound having an ethylenically unsaturated bond and (C) a radiation sensitive polymerization initiator to the surface of a substrate;

pre-baking the so-formed coating film;

exposing the coating film to the radiation through a predetermined pattern mask; and

developing the exposed film to form the barrier rib for an E: display element.

13. (Newly Added) The method of Claim 12, wherein the radiation sensitive composition further comprises (D) a solvent.--

#### REMARKS

Claims 10 and 11 have been canceled. Claims 1-9 and newly added Claims 12 and 13 remain active in the case. Reconsideration of the restriction requirement is respectfully requested.

Restriction has been required in the present application in the form of an election of species of one of the following designated inventions.

Group I: Claims 1-3 drawn to a radiation sensitive resin composition;

Group II: Claims 4-9 drawn to a barrier rib and EL display; and

Group III: Claims 10 and 11 drawn to the use of a radiation sensitive resin composition to form barrier ribs;

In reply to the requirement, applicants hereby elect Claims 4-9 of Group II for examination with traverse.
